

Kedington Home WiFi

"Business Grade Networks for the home"

We have now entered a new era of demands on our home networks. Many more devices and a multitude of services. Video streaming, gaming, home video conferencing, home office working to name just a few.

Kedington - Irelands largest cabling and WiFi integrator - have teamed up with the world technology leader Hewlett Packard Enterprise/Aruba to bring business grade WiFi networks to Irish homes.

Highlights

Speed

Up to 5 times faster
Superior WiFi Technology
Increased number of devices

Coverage

Strong signal in all areas
External coverage options
Single network for the house

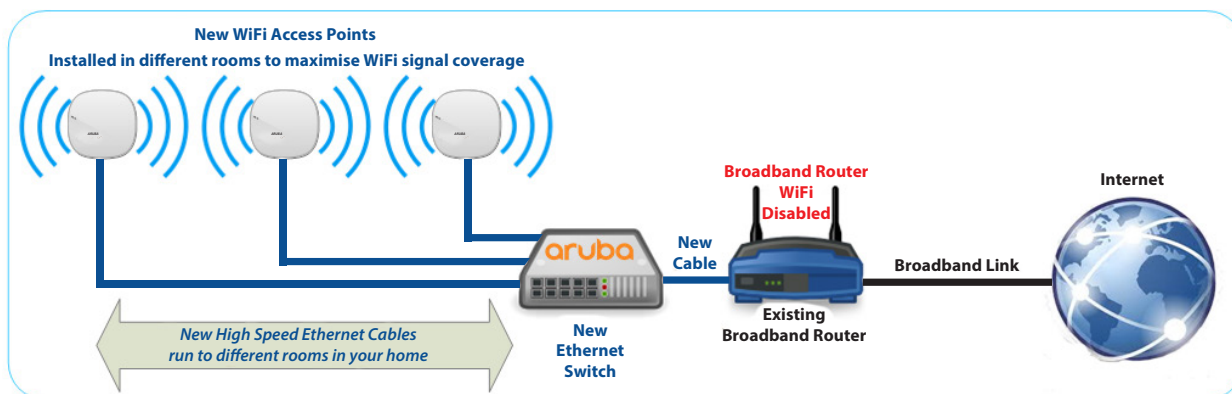

Simplicity

Web App Control
Easy Website blocking
Multiple security options

If you need to be sure of the highest possible quality WiFi network in your home please give us a call on 01- 8660400 or e-mail info@kedington.com.

How do we build your home network?

Step 1

We send a surveyor to assess where we need WiFi access points and agree routes for the data cabling. We always look and agree the least visible routes for our cable runs.

Step 2

Our qualified Electricians/data cabling specialists install high speed Ethernet cabling in your home. The WiFi Access points are also mounted in the agreed locations (If there are existing cables - Only mounting needed)

Step 3

Our Network Engineer comes to your home and configures your new high speed WiFi network

Step 4

The network Engineer connects all of the access points to an Ethernet Switch completing your new home network

Step 5

Your old WiFi network (that has typically been included with your broadband router/modem) is then switched off by our network engineer. The change in speed and coverage will be immediate.

Step 6

The Network Engineer will then introduce you to the Instant On WiFi app and demonstrate its many capabilities to control and secure your network.

Step 7

A 30 day telephone support contract is included. You can contact the Kedington support centre on 01- 8660400 and we can help with any queries you may have about optimising the use of your new WiFi network.

About Us

Kedington have 5 offices in Ireland and employ over 200 people across the Island. We have been installing and supporting business WiFi networks for Irish, Multinational and Government bodies for over 15 years. We support WiFi networks in hundreds of Irish sites today. Kedington are a Hewlett Packard Enterprise Aruba Gold Networking Partner.

Notes:

- (i) Internet connectivity such as a broadband line is not included in this service
- (ii) The WiFi and ethernet switch technology is from the HPE Aruba Instant On product suite – See Instant On Data Sheets for more detail
